Consulting:

With over thirty years of experience as an educator, Bernajeau's seminars and project work reflect extensive, practical experience in technology planning projects, TLCF grants, and technology audits from over 2500 districts throughout the United States and overseas. This includes community future searches, strategic planning, education technology audits, designing and implementing staff development programs, as well as building leadership capacity for systemic change within organizations using technology. She recently developed the IL Technology Planning Blueprint and IL NextSteps technology assessment toolkit for statewide implementation in Illinois. She is author of *Grappling with Accountability: Resource Tools for Organizing and Assessing Technology for Student Results* and *Evaluating Student Computer-based Products*. Her work uses the application of systems thinking and chaos theory to deal with the challenges of change and re-culturing efforts in education today.

Keynotes and Workshops:

- Educators as Futurists
- Grappling with Technology Accountability
- When Pigs Fly: The Future Has Arrived
- The Answer to How is ...YES
- Harnessing the Power of Technology for Student Results
- Wagons East: Settling ALL Educators in the Land of Possibilities
- Cognitive Coaching/Consensus /Teaming
- Change is Good: You GO First!
- Evaluating Student Computer-based Products
- Leave No Teacher Behind
